

ECT Oekotoxikologie GmbH is a company with about 35 employees located in Flörsheim/Main, Germany. Since November 2021, ECT belongs to the globally active SynTech Research Group. At ECT, we investigate the impact of anthropogenic stressors, mostly chemicals, on the environment. Our commercial services and our various research & development activities are requested by chemical and pharmaceutical industries as well as by governmental bodies. Key of our business is the reliable and timely performance of high-quality ecotoxicological studies under the conditions of Good Laboratory Practise (GLP). We are currently establishing an in-house analytical laboratory that will become operational early 2023.

We are seeking to employ an experienced chemist to lead this new analytical department under GLP, with a starting date in fall/winter 2022.

Activities:

- Develop and apply analytical methods (particularly HPLC-MS/MS) to measure various chemicals (pesticides, pharmaceuticals, industrial chemicals) in ecotoxicological test matrices
- Evaluate results and prepare study plans and reports in cooperation with ecotoxicological study directors
- Act as study director or principal investigator for the analytical phase
- Generate standard operating procedures and establish, optimise and supervise laboratory processes and instruments under GLP
- Lead the further development of the analytical department and services including preparation of quotations in cooperation with the management

Qualifications:

- University degree in Chemistry
- Several years of working experience as analytical chemist
- Profound working experience in a GxP environment
- Fluent English (written and spoken)
- Fluent German (written and spoken)
- Ability to effectively communicate and interact with customers and colleagues
- Self-dependent and diligent working attitude

We offer:

- A permanent position in a creative and cooperative working environment
- Profound experience in the ecotoxicological testing of chemicals within the ECT team
- A challenging position with the opportunity to shape the future development of analytical services at ECT

Please send your application, specifying salary expectation and possible starting date, to:
